

README.md

Event Management System

A simple Python + Excel based Event Management System.

Files

- `README-1.md` - Project information and instructions
- `sample\_output-2.txt` - Sample program output
- `event\_management-2.py` - Main Python program
- `event\_management-1.xlsx` - Event records database

Features

- Add a new event
- View all events
- Search events by ID
- Update event details
- Delete an event
- Store event information in Excel

How to run

1. Install Python 3.
2. Install dependencies:
`pip install pandas openpyxl`
3. Run:
`python event\_management-2.py`
