

Event Management System — Sample Output

Python + Tkinter + Excel

1. Login Screen

The application starts with a login screen. Demo credentials shown by the program are: admin / 1234.

Event Management System	
Username	admin
Password	
Login	Button

2. Dashboard

After successful login, the dashboard provides buttons for Add Event, View Events, Search Event, Update Event, Delete Event, and Clear / Reset.

Event Management System		
Add Event	View Events	Search Event
Update Event	Delete Event	Clear / Reset

3. Add Event Output

The Add Event page accepts all eight fields and saves the record to events.xlsx.

Event ID	Sample value
Event Name	Sample value
Event Date	Sample value
Event Time	Sample value
Venue	Sample value
Organizer	Sample value
Contact	Sample value
Event Type	Sample value
Save Event	Button
Back to Dashboard	Button

4. View Events Output

The View Events page displays records stored in Excel in a table.

Event ID	Event Name	Event Date	Event Time	Venue	Organizer	Contact	Event Type
E001	Annual Meeting	25-09-2026	10:00 AM	Main Hall	Admin	9876543210	Meeting

5. Search Event Output

The user enters an Event ID or Event Name. Matching records are shown in the table. If there are no matches, the program displays "No event found."

Example search: E001 → the Annual Meeting record is displayed.

6. Update Event Output

The user enters an Event ID, loads the existing event, edits the fields, and selects Update Event. A success message is then displayed.

Example: E001 → Load Event → change Venue → Update Event → “Event updated successfully.”

7. Delete Event Output

The user enters an Event ID and selects Delete Event. The program asks for confirmation. After confirmation, the selected record is removed from Excel and a success message is displayed.

Example: E001 → Delete Event → confirmation → "Event deleted successfully."

8. Excel File Output

The program automatically creates events.xlsx with an Events worksheet. The worksheet contains these columns:

Event ID
Event Name
Event Date
Event Time
Venue
Organizer
Contact
Event Type
